Sweet Crumbs Bakery

Website Project Explanation

Project overview

Sweet Crumbs Bakery is a bakery website designed to present baked products, show their prices, promote custom celebration cakes, and provide visitors with the bakery's contact information. The design uses a warm, friendly style that matches the bakery theme.

Purpose of the website

The main purpose is to help customers explore the bakery's menu before placing an enquiry or order. Visitors can view different product categories, compare prices, discover custom cake options, read seasonal offers, and find the bakery's address, phone number, email address, and opening hours.

Website sections at a glance

Section	What it contains
Home	Bakery introduction, featured cake image, seasonal offer, and contact details.
Cakes	Six cake varieties with short descriptions and individual prices.
Cookies	Six cookie varieties with descriptions and prices per box.
Custom Cakes	Six celebration-cake design categories with starting prices.
Pastries	Six pastry and cupcake options with individual prices.

1. Home Page

The home page is the main entry point of the website. A dark brown navigation bar at the top displays the bakery name, “Sweet Crumbs Bakery”, and links to Home, Cakes, Pastries, Cookies, Custom Cakes, Offers, and Contact. This navigation helps visitors move directly to the section they want.

Below the navigation bar, a light-pink welcome section introduces the bakery with the heading “Welcome to Sweet Crumbs Bakery”, a short tagline, a featured chocolate cake image, and a sentence describing the products. A separate pink seasonal-offers section highlights a festival discount of 20% off. The Contact Us section displays the bakery name, address in Vijayawada, Andhra Pradesh, phone number, email address, and opening hours (9:00 AM–9:00 PM). A dark brown footer closes the page.

2. Cakes Page

This page is headed “Our Delicious Cakes” and includes the subtitle “Freshly baked cakes made with love!”. Six product cards display Chocolate Cake (■550), Strawberry Cake (■600), Black Forest Cake (■650), Vanilla Cake (■500), Red Velvet Cake (■700), and Birthday Cake (■750). Each card contains a product photograph, name, short description, and price. The card layout makes it easy to scan and compare choices.

3. Cookies Page

The cookies page follows the same product-card layout, with a heading and short introductory line. It lists Chocolate Chip Cookies (■150 per box), Butter Cookies (■120 per box), Oatmeal Cookies (■140 per box), Chocolate Cookies (■160 per box), Sweet and Crispy Cookies (■100 per box), and Almond Cookies (■180 per box). The per-box wording clarifies the pricing unit.

4. Custom Cake Designs Page

This section focuses on made-to-order cakes for special events. It asks customers to choose a favourite design and presents Birthday Cake (from ■800), Wedding Cake (from ■2,000), Chocolate Cake (from ■700), Floral Cake (from ■1,000), Anniversary Cake (from ■900), and Special Occasion Cake (from ■1,200). The phrase “From” indicates that the final price may vary depending on size, decoration, and customization.

5. Pastries Page

The pastries page presents six smaller baked treats: Cream Pastry (■80), Chocolate Pastry (■100), Strawberry Pastry (■90), Vanilla Pastry (■75), Black Forest Pastry (■110), and Vanilla Cupcake (■60). Each item is supported by an image, a brief description, and a clearly emphasized price.

Design and User Interface

Colour scheme: Light pink is used for headings and promotional areas, cream or off-white for the product backgrounds, and dark brown for navigation, headings, and footer elements. These colours create a soft, welcoming bakery look.

Product cards: Product information is grouped into individual white cards with thin, warm-toned borders and rounded corners. Images appear near the top, followed by the product name, description, and bold price.

Consistency: Cakes, cookies, and pastries use a repeated card structure. This makes the pages feel connected and helps customers understand the layout without learning a new design on every page.

Readability: Centered headings, short descriptions, clear spacing, and prominent prices help users quickly understand the content.

Suggested Improvements

• Make every navigation link and product action work correctly on desktop and mobile.
• Add an Order Now or Enquire button to each product card, connected to a real ordering method such as a form or WhatsApp.
• Add cake size, serving quantity, flavour, and customization options where relevant.
• Include an enquiry form with customer name, phone number, product, required date, and special instructions.
• Make the layout responsive so cards wrap neatly on tablets and phones.
• Use descriptive alternative text for product images and ensure text contrast is strong.
• Confirm that the offer, prices, address, phone number, email, and opening hours are kept up to date.

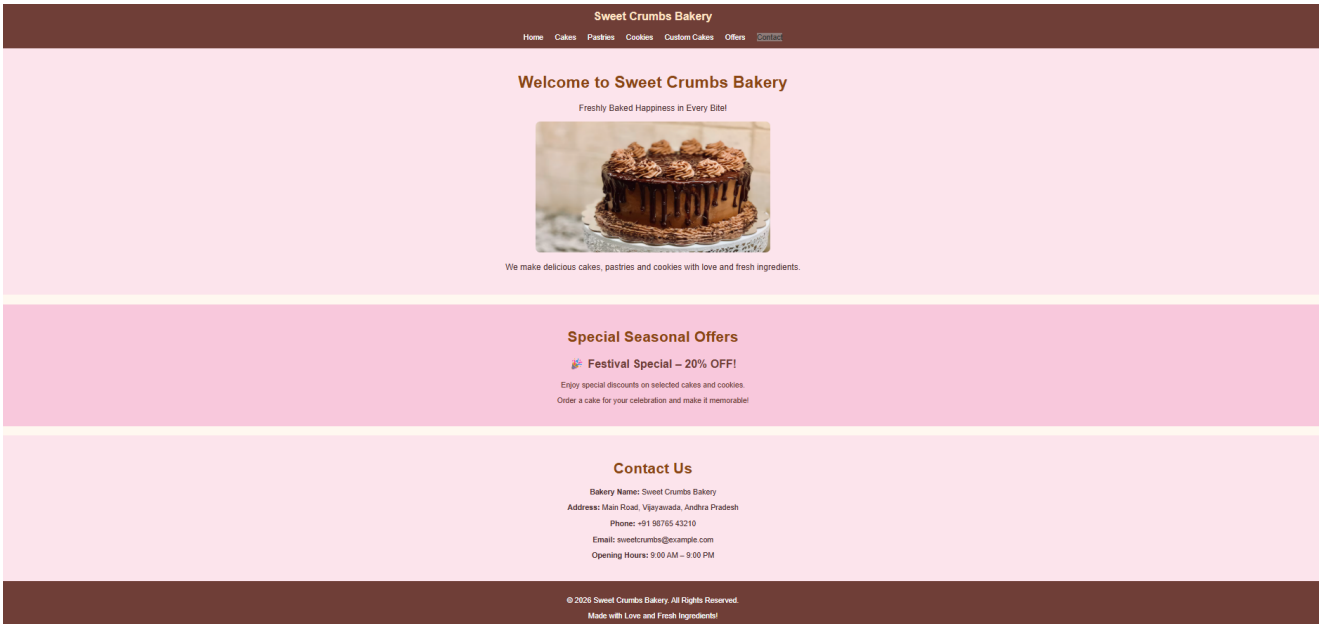

Conclusion

Sweet Crumbs Bakery is a simple product-catalogue website that introduces the bakery and organizes its offerings into clear categories. The visual style is consistent, the product images make the menu attractive, and the prices help customers compare items. Adding responsive behaviour and direct ordering or enquiry features would make the website more useful as a complete bakery business website.
